-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Objection to the Drawings

The drawings are objected to under 37 CFR 1.84 (i) and (p) as being informal. The lines, numbers and letters lack uniformity and are fuzzy lacking sharp definition. No new matter should be entered. Formal replacement drawings are required.

Rejections based on Prior Art

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 14, 15, 17, 19, 29, 31, 33 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Wirsching (US 575,407).

Wirsching discloses a veterinary apparatus for grinding horse teeth comprised of a tool body 15, 6, a drive shaft 13 disposed inside the tool body having a first end configured for attachment to drive mechanism 19 and a second opposite end connected to grinding member 5. The grinding member 5 is capable of pivoting through a variety of angles with respect to the handle 15. In regard to claims 15, 17, 29 and 31, the Wirsching device is capable of having a vacuum hose or fiber optic cable attached to it. In regard to claim 19, note first drive shaft 13 and second drive shaft 6

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16, 18, 30, 32, 34 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wirsching (US 575,407).

In regard to claims 16, 18, 30, 32, the use of suction and illumination with dental devices is old and well known, to have used such prior art devices with the Wirsching device so that the mouth could be suctioned and illuminated would have been obvious to one of ordinary skill in the art. In regard to claims 34 and 36, Wirsching fails to disclose the particularly claimed 90 degree angle, however, one of ordinary skill in the art would have found making the Wirsching device so that it could extend to such an angle obvious in order to improve its range.

Prior Art

Mahaffy (US 741,519), Skylar (US 994,483) and Lang (US 1,151,197) are made of record.

Art Unit: 3732

Allowable Subject Matter

Claims 37-39 are allowed. Claims 5-13, and 20-28 are objected to as being dependent on a rejected base claim, but would be allowable if rewritten in independent form.

Action Made Final

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
